

IN THE CLAIMS:

Add the following new claim:

--11. The herbicidal combination herbicide combinations according to claim 1

wherein component (A) is

and component (B) is fenoxaprop-p-ethyl.--

REMARKS

In response to the Requirement for an Election of Species, Applicants elect the herbicidal combination according to claim 11. Applicants respectfully traverse this requirement if it means that the Examiner will not search additional combinations should it be determined that the elected composition is allowable. Applicants urge that should it be determined that the Requirement is a restriction requirement, Applicants urge that the Requirement would be improper since the Requirement does not establish that the combinations correspond to a special technical feature searching all the combinations constitutes an undue burden, and that it would be contrary to public policy. An indication on how the Examiner intends to use the Requirement is requested. Claims 1 to 11 read upon the elected species.

Component (A) of claim 11 finds support on page 26, line 1. Support for component (B) is found, *inter alia*, in claim 5, line 11. Thus, no new matter is added by this
